

Turn **Medication Intelligence** into Better Quality and Financial Performance

Arcadia powered by Surescripts delivers medication intelligence embedded directly within enterprise population health workflows.

Medication History for Populations combines Surescripts dispensing data with Arcadia's population health platform to help payers understand when medications are dispensed, identify adherence risks, and intervene before quality and cost impacts occur.

\$.58
PMPM

total cost reduction
from improved
medication
adherence¹

Inform and accelerate actions that improve outcomes

Features

Dispensed medication history with up to 12 months of refill activity

Insight into non-plan, pre-plan, and cash-pay medication treatment history

Visibility into clinical context not available in claims data alone

Benefits

Lower readmissions, minimize CMS penalties, and reduce avoidable costs via proactive identification and management of high-risk patients

Improve quality and contract performance by identifying risks, care gaps, and opportunities related to Star Ratings and HEDIS measures earlier

Improve medication adherence monitoring by identifying refill gaps earlier and reducing false nonadherence flags

Enable more effective risk stratification and management of high-risk populations, including new-to-plan members and emerging risks over time

Impact

\$.32
PMPM

Identifying and closing care gaps tied to Star Ratings can generate an estimated \$0.32 PMPM in additional revenue.¹

\$.58
PMPM

Improved medication adherence can reduce total costs by an estimated \$0.58 PMPM, even after accounting for increased prescription spending.¹

Enrich, not replace, existing workflows.

Embedded directly within Arcadia's registries, patient records, and dashboards, medication intelligence enables teams to:

Receive prioritized worklists based on real initiation and refill signals

Align outreach to risk, diagnosis, and care plan

Understand medication behavior within full clinical context

Track improvement across populations tied to contract performance
